## II. AMENDMENTS TO THE CLAIMS:

This listing of claims will replace all prior versions, and listings, of claims in the application:

(Currently amended) A method for using a compound as a fragrance, the method
comprising [[: using]] <u>providing</u> a compound of formula la and the enantiomer
thereof [[as]] <u>to a fragrance application</u>,

wherein the compound of formula 1a is described by the chemical structure:

wherein

R1 is hydrogen or methyl:

R2 is hydrogen; and

R3 is hydroxyl; or

 $R^2$  and  $R^3$  form together with the carbon atom to which they are attached a carbonyl group.

(Previously presented) The method according to claim 1, wherein the compound of formula Ia and the enantiomer thereof are selected from the group consisting of [(1R,3S)-3-isopropyl-1-methylcyclopentyl]methanol, [(1S,3R)-3-isopropyl-1-methylcyclopentyl]methanol, 1-[(1R,3S)-3-isopropyl-1-methylcyclopentyl]ethanone, 1-[(1S,3R)-3-isopropyl-1-methylcyclopentyl]ethanol and 1-[(1S,3R)-3-isopropyl-1-methylcyclopentyl]ethanol and 1-[(1S,3R)-3-isopropyl-1-methylcyclopentyl]ethanol.

Application Serial No.: 10/372,804
Applicant: Jerzy A. Bajgrowicz
Office Action mailed: July 25, 2008
Response Filed: October 24, 2008

(Currently amended) A method for using a compound as a fragrance, the method
comprising [[: using]] providing a compound of formula I enriched in the enantiomer
having formula Ia [[, as]] to a fragrance application,

wherein the compound of formula I is described by the chemical structure:

wherein the enantiomer having formula Ia is described by the chemical structure:

wherein

R1 is hydrogen or methyl;

R2 is hydrogen; and

R<sup>3</sup> is hydroxyl; or

 $R^2$  and  $R^3$  form together with the carbon atom to which they are attached a carbonyl group.

(Currently amended) A method for using a compound as a fragrance, the method
comprising [[: using]] <u>providing</u> a compound of formula I enriched in the enantiomer
having formula Ib [[, as]] <u>to</u> a fragrance <u>application</u>,

wherein the compound of formula I is described by the chemical structure:

Applicant: Jerzy A. Bajgrowicz Office Action mailed: July 25, 2008 Response Filed: October 24, 2008

wherein the enantiomer having formula Ib is described by the chemical structure:

wherein

R1 is hydrogen or methyl;

R2 is hydrogen; and

R3 is hydroxyl; or

 $R^2$  and  $R^3$  form together with the carbon atom to which they are attached a carbonyl group.

(Currently amended) A method for using a compound as a fragrance, the method
comprising [[: using]] <u>providing</u> a compound of formula I, Ia, or lb [[in]] <u>to</u> a
fragrance application,

wherein the compound of formula I is described by the chemical structure:

wherein the compound of formula Ia is described by the chemical structure:

Applicant: Jerzy A. Bajgrowicz Office Action mailed: July 25, 2008 Response Filed: October 24, 2008

wherein the compound of formula Ib is described by the chemical structure:

wherein

R1 is hydrogen or methyl;

R2 is hydrogen; and

R3 is hydroxyl; or

 $R^2$  and  $R^3$  form together with the carbon atom to which they are attached a carbonyl group.

(Previously presented) A fragrance application comprising a compound of formula I,
 Ia, or Ib

wherein the compound of formula I is described by the chemical structure:

Applicant: Jerzy A. Bajgrowicz Office Action mailed: July 25, 2008 Response Filed: October 24, 2008

wherein the compound of formula Ia is described by the chemical structure:

wherein the compound of formula Ib is described by the chemical structure:

wherein

R1 is hydrogen or methyl;

R2 is hydrogen; and

R3 is hydroxyl; or

R<sup>2</sup> and R<sup>3</sup> form together with the carbon atom to which they are attached a carbonyl group.

- (Previously presented) The fragrance application according to claim 6, wherein the fragrance application is a perfume, household product, laundry product, body care product, or cosmetic product.
- 8. (Currently amended) A method of manufacturing a fragrance application, the method comprising:

incorporating into a base material a compound of formula Ia or its enantiomer.

Applicant: Jerzy A. Bajgrowicz Office Action mailed: July 25, 2008 Response Filed: October 24, 2008

wherein the compound of formula la is described by the chemical structure:

wherein

R1 is hydrogen or methyl;

R2 is hydrogen; and

R<sup>3</sup> is hydroxyl; or

 $R^2$  and  $R^3$  form together with the carbon atom to which they are attached a carbonyl group.

## 9. (Previously presented) A compound comprising:

a compound of formula Ia, wherein the compound of formula Ia is described by the chemical structure:

$$\begin{array}{c|c} & & & \\ & & & \\ & & & \\ & & & \\ & & & \\ & & & \\ & & & \\ & & & \\ & & & \\ & & & \\ & & & \\ & & & \\ & & & \\ & & & \\$$

wherein

R1 is hydrogen or methyl;

R2 is hydrogen; and

R3 is hydroxyl; or

 $R^2$  and  $R^3$  form together with the carbon atom to which they are attached a carbonyl group.

Application Serial No.: 10/572.804 Applicant: Jerzy A. Bajgrowicz Office Action mailed: July 25, 2008 Response Filed: October 24, 2008

## 10. (Currently amended) A compound comprising:

a compound of formula lb, wherein the compound of formula lb is described by the chemical structure:

$$\mathbb{R}^3$$

$$\mathbb{R}^2$$

$$\mathbb{R}^3$$

$$\mathbb{R}^3$$

$$\mathbb{R}^3$$

$$\mathbb{R}^3$$

wherein

R1 is hydrogen or methyl;

R2 is hydrogen; and

R3 is hydroxyl; or

 $\mathbb{R}^2$  and  $\mathbb{R}^3$  form together with the carbon atom to which they are attached a carbonyl group.
